Education

Master, *Faculty of Mathematics and Physics UK*, **2014–2017**
(unfinished).

Major: Artificial Intelligence

Bachelor, *Fakulta Informačních Technologií ČVUT*, **2009–2014**
Grade.

Major: Theoretical Computer Science

Master thesis

Title: *Natural language processing with deep neural networks (unfinished)*

Supervisor: Petr Baudiš

Bachelor thesis

Title: *Algorithms for Origami Folding*

Supervisor: Pavel Kordík

Won dean's award for excellent work

Experience

Vocational

Freelancer. **2016–2017**

Various projects. Teaching. Mentoring for *Czechitas*. Crypto-currency trading. Kaggle challenge.

ML developer, *Jackova továrna s.r.o*, Prague. **Summer 2016**

ML system for analysis and control of ads using Pandas/scikit...

Internship, *GoodAI*, Prague. **Summer 2015**

Implementation of Monte Carlo AIXI

Founder, *Omega*, Prague. **Summer 2013**

Startup selling music.

Miscellaneous

Founder, *Czech foundation for Effective Altruism*. **2016–**
Non-profit. Various experience, like organizing conference EAGxPrague for 140 people.

Organizer, *LessWrong Prague*. **2015–**
Community about human rationality.

Languages

Czech: Mother tongue

English: Proficient

Skill-set

- Very good knowledge of Python (my favorite language since 2008). Experience with many other languages (C, Scala, Clojure, Java, AVR assembler, PHP, Wolfram Mathematica, C#, ...)
- Programming is my main hobby since 2005. Thanks to it I have experience with many different technologies.
- I am interested Deep Neural Networks. And in artificial intelligence in general.
- See my [github](#) for some code.
